SUBJECT INDEX*

A

Absorption, fat, tocopherol response curves and, 700
vitamin A, effect of eating upon, 924 (Abst.)
Acetate metabolism of blood cholesterol synthesis, 809 (Abst.)
Acetazoleamide studies in cardiac edema, 943 (Abst.)
Acid-fastness of tubercle bacilli, metabolic significance of, 828 (Abst.)
Acidity, gastric, control by new way of antacid administration, 955 (Abst.)
effect of pepper and depepperinized condiment on, 819 (Abst.)
Acidosis, relation of, to urinary ammonia excretion in patients receiving cation exchange resins, 783 (Abst.)
ACTH and cortisone, therapeutic evaluation in idiopathic thrombocytopenic purpura, 918 (Abst.)
and nitrogen mustard treatment of nephrotic syndrome, 918 (Abst.)
effect on acute glomerulonephritis, 821 (Abst.)
on metabolism and excretion of ascorbic acid, 948 (Abst.)
steroidal excretion and metabolic effects induced in man by stress and by, comparison of, 796 (Abst.)
stimulation, influence of, on antibody production, 389
Acute disseminated lupus erythematosus, erythrophagocytic properties of serum in, 940 (Abst.)
glomerulonephritis, effect of ACTH on, 821 (Abst.)
Adenosine-triphosphate level of blood of normal persons and patients with Hodgkin's disease, effect of adenylates on, 255
Adenylates, effect of, on level of adenosine-triphosphate in blood of normal persons and of patients with Hodgkin's disease, 255
Adrenal cortical hormones, "delayed therapocorticoid effect" a previously undescribed action of, its importance in successful treatment of eye disease, 970 (Abst.)
steroids, methods of estimation, with tetrazolium salts, 749
Adrenocortical stimulation, influence of, on antibody production, 389
Agar-plate method, effect of clumping of intracellular and extracellular bacteria on results obtained with, 289
Air, pneumoperitoneum, changes in composition of, following injection of ambient air, 788 (Abst.)
Alcohol consumption, influence of, on hepatic function in healthy gainfully employed men, 705
Alcoholic steatosis of liver, jaundice complicating, 958 (Abst.)
Alkaline phosphatase test, a known enzyme concentration as a control in, 657
Alkalosis, electrocardiographic response to, effect of renal function upon, 815 (Abst.)
Allergenic foods, test feeding, experimentally induced cerebral syndrome following, 931 (Abst.)
experimentally induced somnolentia following exposure to certain petroleum products and, 932 (Abst.)
Alveolar-arterial oxygen pressure gradient in mitral stenosis, 108
Ambient air, changes in composition of pneumoperitoneum air following injections of, 788 (Abst.)
Amebiasis, effect of erythromycin in, 955 (Abst.)
Amithiozone, depression of coproporphyrin excretion by, 454
Anemia, aplastic, cortisone in, production of megaloblastic marrow by, with subsequent response to vitamin B_{12}, 778 (Abst.)
bloods, sickle-cell, composition of non-S hemoglobin fraction in, comparative quantitative study by methods of electrophoresis and alkali denaturation, 193
hemolytic, associated with cold hemagglutination, pathogenesis of hemolysis in, 927 (Abst.)
megaloblastic, nucleic acid composition of bone marrow in, effect of vitamin B_{12}, folic acid and ascorbic acid on, 959 (Abst.)
pernicious, alteration of ascorbic acid oxidation in, 967 (Abst.)
nasal instillation and inhalation of crystalline B_{12} treatment, 925 (Abst.)

*Abstracts of articles read before the Central Society for Clinical Research are indicated by (Abst.).

Anemia—Cont'd
serum vitamin B_{12} concentrations in, 928 (Abst.)
stomach in; cytologic study, 942 (Abst.)
Angina pectoris, ethaverine in, 953 (Abst.)
Antacid administration, new way of controlling gastric acidity, 955 (Abst.)
Antiadrenergic drug, Regitine, urinary pH response to hemoglobin and its modification by, and by changes in serum sodium level, 78
Antibiotic combinations and resistance to antibiotics, 877
usage in hospital, effect of, on incidence of antibiotic-resistant strains among personnel carrying staphylococci, 832 (Abst.)
Antibiotics, antibiotic combinations and resistance to, 877
sensitivities of individual strains of Micrococcus pyogenes to, chromosome map based on determinations of, 960 (Abst.)
sensitivity tests with combinations of; unsuitability of disc method, 163
Antibodies, Rh, titer of, effect of some serums on, 85
Antibody, effect of specific, on phagocytosis of virus modified R.B.C., 922 (Abst.)
formation in malignant lymphomas, 232
production, influence of adrenocortical stimulation on, 389
Anticoagulant, Dipaxin, an oral, clinical evaluation of, 968 (Abst.)
Antidiuresis spontaneous, during water diuresis; renal function and electrolyte excretion, 509
Antiemetic agent, chlorpromazine, clinical studies of, 828 (Abst.)
Antifungal activity of some aromatic diamidines, 638
Antigen localization and degradation and histologic reaction in spleen of normal, x-irradiated, and spleen-shielded rats, 598
Antigenicity of platelets and evidence of platelet groups and types in man, 723
Antimetabolite, 6-Mercaptopurine, a new, in treatment of leukemia, clinical evaluation of, 792 (Abst.)
Antipyretic action of cortisone, 779 (Abst.)
Antirabbit platelet and red-cell factors in normal blood, 713
Antistreptolysin failure to protect against streptococcal infection, 140
Apparatus, constant injection, a satisfactory, 663
employed in plate complement-fixation tests, 655
Aromatic diamidines, antifungal activity of some, 638
Arterial circulation in complete heart block, 821 (Abst.)
oxygen content, pulmonary, role of, in genesis of pulmonary hypertension, 785 (Abst.)
wedge pressure, pulmonary, significance of, 408
Arteriosclerosis, incidence in intramural, as compared to extramural coronary arteries, 801 (Abst.)
primary pulmonary, 794 (Abst.)
Arthritis, rheumatoid, serum protein fractions in, 805 (Abst.)
Ascites, body weight in hepatic cirrhosis and, relation of acute changes in colloidal osmotic pressure to, 688
Ascorbic acid, metabolism and excretion, effect of ACTH on, 948 (Abst.)
oxidation, alteration in pernicious anemia, 967 (Abst.)
Assay of estrogens, depression of gonadotropin excretion as method for, in human subject, 831 (Abst.)
Atrial pressure pulse waves, left, characteristics of, recorded at thoracotomy from normal human hearts and from those with mitral stenosis and regurgitation, 781 (Abst.)
septal defects before and after closure, pulmonary hemodynamic pattern in, 785 (Abst.)
Attitude, relation of eczema to, and to vascular reactions of human skin, 238
Auricular fibrillation, occurrence in immediate postoperative period following mitral valvulotomy, 799 (Abst.)
sinus rhythm in, restoration by use of quinidine, 957 (Abst.)
Auriculoventricular pressure gradients, right, with special reference to tricuspid stenosis, 789 (Abst.)
Automatic shaker for Rhesus grouping, rapid method, 472
Avian erythrocytes, uptake in vitro of radioactive iron by, 833
Azoalbumin method for determination of peptic activity, 915

B

Bacteremia, posttonsillectomy, effect of preoperative penicillin treatment on bacterial content of excised tonsils and on, 936 (Abst.)
Bacteria in transfusion reactions and isolated from blood products, 273
intracellular and extracellular, effect of clumping of, on results obtained with agar-plate method, 289
isolated from blood products, 273

Bacterial content of excised tonsils, effect of preoperative penicillin treatment on, and on posttonsillectomy bacteremia, 936 (Abst.)
Ballistocardiogram, clinical and laboratory correlation of, 825 (Abst.)
Benzethacil and penicillin G by mouth, 417
Biological test for incubators, 158
Biopsy, needle, as aid in diagnosis of renal disease, 152
Blastomycosis, histoplasmosis, and coccidioidomycosis, serologic diagnosis with respect to, and the problem of cross reactions, 896
Blood acetone and blood glucose, rapid determination of, 474
  ammonia and electrolytes in hepatic coma, 499
  and blood products, bacteria from, 273
  and bone marrow studies in methimazole granulocytopenia, 920 (Abst.)
  and urine, protein in, interference with fibrin formation in multiple myeloma by unusual, 847
  antirabbit platelet and red-cell factors in normal, 713
  cells, red, survival of, radioactive sodium chromate for study of. I. The effect of radioactive sodium chromate on red cells, 358
    II. The rate of hemolysis in certain hematologic disorders, 368
  cholesterol synthesis, acetate metabolism of, 809 (Abst.)
  coagulation times and heparin blood levels, relation between, 92
  fibrinogen, viscosimetric determination of, 641
  flow, hepatic, effect of carbon doixide upon, 954 (Abst.)
  glucose and blood acetone, rapid determination of, 474
  human, preservation of, stored in experimental plastic containers, evaluation of. I. In vitro studies, 665
    II. In vivo studies, 674
  isotope levels following test meal of I^{131}-labeled protein, 377
  level of adenosine-triphosphate, effect of adenylates in normal patients and in patients with Hodgkin's disease, 255
  levels, heparin, and blood coagulation times, relation between, 92
  lymphocytes, quantitative and qualitative changes of, assessment of stress by means of, 538
    responses of, to stress stimuli, 530
  plasma concentration of reducing corticoids in human beings, 795 (Abst.)
  pressure and heart rate, influence of protein and carbohydrate diet on, in normal dogs, 966 (Abst.)
Blood pressure—Cont'd
  and pulse rate, effect of exercise on, in normal subjects, 803 (Abst.)
  intravenous McN-181 in, response to, 810 (Abst.)
  level necessary to maintain glomerular filtration rate in hypertension, attempt to determine the critical, by use of ganglionic blocking agents for reducing blood pressure, 819 (Abst.)
  patterns, mechanical heart, with direct visualization of mitral valve in living heart, 807 (Abst.)
  reduction to hypotensive levels by ganglionic blockade with hexamethonium, Arfonad, and Pendiomide, cerebral and renal hemodynamic responses to, 920 (Abst.)
  pyruvic acid levels in mild thiamine deficiency, effects of glucose on, 261
  renal, of dog, hypocholesterolemic factor in, attempt to establish presence of, 800 (Abst.)
  volume method, 815 (Abst.)
Bloods, anemia, sickle-cell, composition of non-S hemoglobin fraction in, comparative quantitative study by methods of electrophoresis and alkali denaturation, 193
Body weight in hepatic cirrhosis and ascites, relation of acute changes in colloidal osmotic pressure to, 688
Bone marrow and blood studies in methimazole granulocytopenia, 920 (Abst.)
  emulsion, homologous, effect on rabbits after total body irradiation, 581
  in megaloblastic anemias, nucleic acid composition of, effect of vitamin B_{12}, folic acid, and ascorbic acid on, 959 (Abst.)
Breathing, glossopharyngeal, 782 (Abst.)
Bubble flow meter, stable precision in a readily assembled, continuously recording photoelectric, 766
Butanol extractable I^{131}, clinical value in diagnosis of hyperthyroidism, 949 (Abst.)

C

C^{14} isoniazid, uptake of, and metabolic state of tubercle bacilli, relationship between, 779 (Abst.)
Cancerocidal agents, unstained cell counts as method of evaluating, 326
Carbohydrate metabolism, erythrocyte. I. The flow of C^{14}-glucose carbon into lactic acid, carbon dioxide, cell polymers, and carbohydrate intermediate pool, 178

Carbohydrate metabolism, erythrocyte—Cont'd
II. Chromatographic isolation of monophosphoglycerate, diphosphoglycerate, and adenosine triphosphate and their metabolic turnover with glucose carbon, 188
Carbon dioxide and routine cultures in diagnostic laboratory, 485
effect upon hepatic blood flow, 954 (Abst.)
tetrachloride poisoning, severe, with recovery followed by fatal homologous serum hepatitis, 380
Cardiac edema, acetazoleamide studies in, 943 (Abst.)
output, determination of, by dye method, improved injection pipette for, 773
Cardiopulmonary evaluation during graded exercise in normals and in patients with heart and lung disease, 820 (Abst.)
Cardiovascular function in healed myocardial infarction, 794 (Abst.)
response to exercise, effect of thoracocervical vagectomy on, 803 (Abst.)
Carr-Price antimony trichloride reagent for determination of vitamin A, use of 1,2-dichloroethane in, 660
Cation exchange resins, urinary ammonia excretion in patients receiving, relation of acidosis to, 783 (Abst.)
Cation-anion exchange resin, biochemical and clinical effects from, in decompensated hepatic cirrhosis, 518
Cell counts, unstained, as method of evaluating cancerocidal agents, 326
formation in bone marrow, spleen, and thymus of rat, effect of corticotropin on, 937 (Abst.)
Cells, latent viral infections of, 813 (Abst.)
Central Society for Clinical Research, proceedings of the twenty-sixth annual meeting, October 30-31, 1953, 776, 918
Cerebral syndrome, experimentally induced, following test feeding of allergenic foods, 931 (Abst.)
Cerebrospinal fluid, gamma globulin in, photometric microdetermination of, by quantitative protein flocculation-ninhydrin reaction, 316
pressure, increased, and papilledema as independent manifestations of malignant hypertension, 957 (Abst.)
Chloride, sodium, and potassium contents of thermal sweat of man collected from small isolated areas of skin, 58
"space" and total exchanging chloride in man measured with long-life radiochloride Cl^{36}, 16
3-Chloromercuri-2-methoxypropylurea (1347 EX), a new oral mercurial diuretic, clinical experience with, 269
Chlorpromazine, antiemetic agent, clinical studies of, 828 (Abst.)
Cholecystostomy, effect of, on subsequent gall bladder function, 830 (Abst.)
Cholesterol esters, dependence of percentage upon degree of jaundice, 134
Choline utilization, influence of modification of intestinal flora upon, 822 (Abst.)
Circulation, arterial, incomplete heart block, 821 (Abst.)
of edematous subjects, disappearance of iodinated (I^{131}) serum albumin from, by continuous recording method, 925 (Abst.)
Cirrhosis, Laennec's, metabolic studies of, 923 (Abst.)
of liver, multiple myeloma, and eclampsia, clotting factor of plasma deficient in, 933 (Abst.)
Cl^{36}, chloride "space" and total exchanging chloride in man measured with, 16
Clinical syndrome in essential telangiectasia, pulmonic and tricuspid stenosis, and neoplastic liver disease, a possible new, 941 (Abst.)
Coccidioides immitis, morphology and sporulation capacity of forty-seven strains, 438
Coccidioidomycosis, histoplasmosis, and blastomycosis, serologic diagnosis with respect to, and the problem of cross reactions, 896
Cold agglutination, serum panagglutinin active against trypsinated human erythrocytes in relation to, 205
hemagglutination, hemolytic anemia associated with, pathogenesis of hemolysis in, 927 (Abst.)
injury, mild local, plasma lipoprotein changes induced by, 112
Colloidal $gold^{198}$, intravenous, treatment of chronic granulocytic leukemia with, early results of, 777 (Abst.)
osmotic pressure, acute changes in, relation of, to body weight in hepatic cirrhosis and ascites, 688
radioactive chromic phosphate, distribution after intracavitary administration in rat, 867
Complement-fixation tests, plate, apparatus employed in, 655
Compound F, intravenous infusion as means of differentiating hyperadrenal states, 951 (Abst.)
Congenital familial deficiency of stable prothrombin conversion factor, 212
pulmonic stenosis, electrocardiogram in, 952 (Abst.)

Constant injection apparatus, a satisfactory, 663
Coproporphyrin excretion, depression of, by amithiozone, 454
Coronary arteries, arteriosclerosis in intramural as compared with extramural, 801 (Abst.)
flow, adjustments of, to work of heart, 823 (Abst.)
Corticoids, reducing blood plasma concentration of, in human subjects, 795 (Abst.)
Corticosteroid excretion in liver disease, 116
Corticotropin effect on cell formation in bone marrow, spleen, and thymus of rat, 937 (Abst.)
Cortisone and ACTH, therapeutic evaluation in idiopathic thrombocytopenic purpura, 919 (Abst.)
and Coxsackie virus, induction of myocardial lesions by, 826 (Abst.)
antipyretic action of, 779 (Abst.)
effect of large doses of, upon ability of reticuloendothelial cells to phagocytose streptococci, 746
in aplastic anemia, production of megaloblastic marrow by, with subsequent response to vitamin B_{12}, 778 (Abst.)
treatment of chronic myeloid leukemia in mice, 963 (Abst.)
of myocardial infarcts, 807 (Abst.)
Coxsackie virus and cortisone, induction of myocardial lesions by, 826 (Abst.)
Craniospinal venous bed, elasticity of, 944 (Abst.)
Creatinine and inulin, renal excretion in man, 621
coefficient, relationship of, to leanness-fatness in man, 784 (Abst.)
Creatinuria in myocardial infarction, 780 (Abst.)
Crystalline B_{12}, nasal instillation and inhalation in pernicious anemia, 925 (Abst.)
Cultures, routine, carbon dioxide and, in the diagnostic laboratory, 485
Cutaneous interstitial fluids in human beings, study of movements of, by means of a fluorescent tracer substance, 299
Cytoplasmic changes due to influenza virus, early electron microscopy of, 813 (Abst.)

D

Deficiency of stable prothrombin conversion factor, congenital familial, 212
thiamine, blood pyruvic acid levels in mild, effects of glucose on, 261
"Delayed therapocorticoid effect," previously undescribed action of adrenal cortical hormones; its importance for successful treatment of eye disease, 970 (Abst.)
Desoxypyridoxine, vitamin B_6 deficiency induced by, effect of, in human beings, 335
Dextran, metabolism of; a plasma volume expander, 6
radioactive carbon-labeled, studies in dogs, 6
Diabetes mellitus, diketogulonic acid and, 681
spontaneous, in dogs, 937 (Abst.)
Diabetic retinitis, alterations in serum globulins, cholesterol, and lipoproteins as related to, 812 (Abst.)
Diagnostic laboratory, carbon dioxide and routine cultures in, 485
Dialized concentrated human urine, effect on renal function in human being, 685
Diamidines, aromatic, antifungal activity of some, 638
Diet and environmental temperature, effect of, on diurnal rhythm of serum iron level, 817 (Abst.)
influence of, on blood pressure and heart rate of normal dogs. I. Protein and carbohydrate, 966 (Abst.)
Dietary constituents, effect on hypercholesteremia, assay technique for evaluating, 822 (Abst.)
protein, modifications of, production and repair of experimental liver dysfunction by, 823 (Abst.)
Dihydrostreptomycin-penicillin therapy for subacute streptococcal endocarditis, clinical and laboratory experiences with, 806 (Abst.)
Diketogulonic acid and diabetes mellitus, 681
Dioxyline in plasma, spectrophotometric determination of, 479
Dipaxin, oral anticoagulant, clinical evaluation of, 968 (Abst.)
Disc method, unsuitability of, in sensitivity tests with combinations of antibiotics, 163
Dissection of vectorcardiogram, 814 (Abst.)
Diuresis, water, spontaneous antidiuresis during; renal function and electrolyte excretion, 509
Diuretics, mercurial, comparative efficacy of various, 802 (Abst.)
Diurnal rhythm of serum iron level, effect of diet and environmental temperature on, 817 (Abst.)
Dye method of determination of cardiac output, improved injection pipette for, 773
Dynamics of third heart sound, 800 (Abst.)

E

Eating, effect of, on absorption of vitamin A, 924 (Abst.)
Eclamptogenic toxemia of pregnancy, intravascular hemolysis, thrombocytopenia, and other hematologic abnormalities associated with, 929 (Abst.)

Eczema, relation of, to attitude and to vascular reactions of human skin, 238
Edema, cardiac, acetazoleamide studies in, 943 (Abst.)
malnourished patients with, observations on, 954 (Abst.)
resistant, relief by utilization of a sump phenomenon, 946 (Abst.)
Education, medical intern-resident, changing trends in, 1
Elasticity of craniospinal venous bed, 944 (Abst.)
Electrocardiogram in congenital pulmonic stenosis, 952 (Abst.)
in mitral valve disease, 950 (Abst.)
Electrocardiographic response to alkalosis, effect of renal function upon, 815 (Abst.)
Electrocardiographs and other low frequency signals, local and long distance transmission and storage of, 931 (Abst.)
Electrolyte space measured by tracer method in intact man, 34
Electrolytes, blood ammonia and, in hepatic coma, 499
Electron microscopy of early cytoplasmic changes due to influenza virus, 813 (Abst.)
Electrophoresis of lipoproteins, effect of injected heparin on, in hypercholesterolemia, 786 (Abst.)
starch zone, thyroxin in alpha globulin fraction of serum separated by, radiochromatographic identification of, 777 (Abst.)
Endocarditis, experimental *Streptococcus mitis*, induction and pathologic characteristics of, 930 (Abst.)
subacute streptococcal, penicillin-dihydrostreptomycin therapy for, clinical and laboratory experiences with, 806 (Abst.)
Endocrine changes after hemiadrenalectomy and total body irradiation in parabiotic rats, 396
Enzymatic dissolution of intravascular clots, 952 (Abst.)
Enzyme concentration, a known, as a control in alkaline phosphatase test, 657
Erythrocyte carbohydrate metabolism. I. The flow of C^{14}-glucose carbon into lactic acid, carbon dioxide, cell polymers, and carbohydrate intermediate pool, 178
II. Chromatographic isolation of monophosphoglycerate, diphosphoglycerate, and adenosine triphosphate and their metabolic turnover with glucose carbon, 188
Erythrocytes, avian, uptake in vitro of radioactive iron by, 833
human, in vitro uptake of radiophosphorus by, factors influencing, 165
trypsinated human, normal serum panagglutinin active against, studies on. II. Relationship to cold agglutination, 205
Erythromycin and penicillin in streptococcal infections, comparative efficacy of, 811 (Abst.)
effect in amebiasis, 955 (Abst.)
Erythrophagocytic properties of serum in acute disseminated lupus erythematosus, 940 (Abst.)
Essential hypertension, treatment with renin and antirenin in dogs, 824 (Abst.)
Esterases, human, 445
Estrogens, assay of, depression of gonadotropin excretion as method for, in human subject, 831 (Abst.)
Ethaverine in angina pectoris, 953 (Abst.)
Ethylenediaminetetraacetic acid in mobilization and removal of iron in hemochromatosis, 550
Evans blue, determination of, using zephiran as a solvent, 493
EX 1347, a new oral mercurial diuretic, clinical experience with, 269
Exercise, cardiovascular response to, effect of thoraco-cervical vagectomy on, 803 (Abst.)
effect of, on blood pressure and pulse rate of normal subjects, 803 (Abst.)
graded, cardiopulmonary evaluation during, in normals and patients with heart and lung disease, 820 (Abst.)
Exophthalmos, relationship of, to variations of thyroid function, 780 (Abst.)
Experimental hepatic injury, serum iron in, 934 (Abst.)
porphyria, 947 Abst.)
liver dysfunction, production and repair of, by modifications of dietary protein, 823 (Abst.)
plastic containers, preservation of human blood stored in, evaluation of. I. In vitro studies, 665
II. In vivo studies, 674
shock, produced by meningococcus toxin, 787 (Abst.)
Streptococcus mitis endocarditis, induction and pathologic characteristics of, 930 (Abst.)
Eye disease, importance of "delayed therapocorticoid effect" of adrenal cortical hormones in successful treatment of, 970 (Abst.)

F

Fat absorption, tocopherol response curves and, 700
intravenous, thermogenic response following, possible relationship of hemolysis to, 780 (Abst.)
Fibrin formation in multiple myeloma, interference with, by an unusual protein found in blood and urine, 847
Fibrinogen, blood, viscosimetric determination of, 641
Fluids, cutaneous interstitial, study of movements of, in human beings by means of a fluorescent tracer substance, 299
Folin-Ciocalteau reagent, in presence of copper, colorimetric method for determination of total protein in spinal fluids using, confirmation of accuracy of, 489
Frog breathing, 782 (Abst.)
Fructose, renal tubular reabsorption of, maximal in normal and diabetic man, 827 (Abst.)

G

Gall bladder function, effect of cholecystostomy upon subsequent, 830 (Abst.)
Gamma globulin, photometric microdetermination of, in cerebrospinal fluid by quantitative protein flocculation-ninhydrin reaction, 316
prophylaxis, effect of, on susceptibility to reinfection, 808 (Abst.)
Ganglionic blockade with hexamethonium, Arfonad, and Pendiomide, cerebral and renal hemodynamic responses to blood pressure reduction to hypotensive levels by, 920 (Abst.)
Gastric acidity, control by a new way of antacid administration, 955 (Abst.)
effect of pepper and depepperinized condiment on, 819 (Abst.)
juice, effect on urinary excretion of radioactivity after oral radioactive vitamin B_{12}, 860
protein patterns in, as identified by ultracentrifuge, 969 (Abst.)
Gastrointestinal hemorrhage, massive, anatomical study of causes and associated pathology in autopsied cases, 829 (Abst.)
Globin, human, toxic effects of modified, 224
Globulin, modified human, effects of, in human subject, 459
Glomerular filtration rate in hypertension, level of blood pressure necessary to maintain, attempt to determine the critical, by use of ganglionic blocking agents for reducing blood pressure, 819 (Abst.)
Glomerulonephritis, acute, effect of ACTH on, 821 (Abst.)
Glossopharyngeal breathing, 782 (Abst.)
Glucose, effects of, on blood pyruvic acid levels in mild thiamine deficiency, 261
Gonadotropin excretion, depression of, as method for assay of estrogens in human subject, 831 (Abst.)
Gout in Negro and white males at Cook County Hospital, relative incidence of, 927 (Abst.)
oral phenylbutazone in, 818 (Abst.)
Granulocytic leukemia, chronic, treatment with intravenous colloidal gold^{198}, early results of, 777 (Abst.)
Granulocytopenia, methimazole, blood and bone marrow studies in, 920 (Abst.)
Group A hemolytic streptococci infections, repeated pulmonary, nonspecific protective effect in, 809 (Abst.)

H

Heart and lung disease, exercise in, cardiopulmonary evaluation during graded, 820 (Abst.)
block, complete, arterial circulation in, 821 (Abst.)
blood pressure patterns, mechanical, with direct visualization of mitral valve in living heart, 807 (Abst.)
disease, ventilation in, mechanics of, 791 (Abst.)
rate and blood pressure, influence of protein and carbohydrate diet on, in normal dogs, 966 (Abst.)
sound, third, dynamics of, 800 (Abst.)
work of, adjustments of coronary flow to, 823 (Abst.)
Hematopoietic tissues, Maximow technique for preparation of sections of, 145
Hemiadrenalectomy and total body irradiation, endocrine changes after, in parabiotic rats, 396
Hemochromatosis, ethylenediaminetetraacetic acid in mobilization and removal of iron in, 550
Hemodynamic studies, preoperative and postoperative, in mitral commissurotomy, 945 (Abst.)
Hemoglobin syndromes, abnormal, red cell survival studies in, 963 (Abst.)
urinary pH response to, and its modification by an antiadrenergic drug and by changes in serum sodium level, 78
Hemoglobins, abnormal, studies on. VII. The composition of the non-S hemoglobin fraction in sickle-cell anemia bloods. A comparative quantitative study by the methods of electrophoresis and alkali denaturation, 193

Hemolysis of red cells in hereditary spherocytosis and sickle cell disorders, function of spleen in, 965 (Abst.)
possible relationship of, to thermogenic response following intravenous fat, 780 (Abst.)
rate of, in certain hematologic disorders, 368
Hemolytic anemia associated with cold hemagglutination, pathogenesis of hemolysis in, 927 (Abst.)
Hemophilic condition in female, 929 (Abst.)
Hemorrhage, gastrointestinal, massive, anatomical study of causes and associated pathology in autopsied cases, 829 (Abst.)
Heparin blood levels and blood coagulation times, relation between, 92
effect of injected, on electrophoresis of lipoproteins in hypercholesterolemia, 786 (Abst.)
Hepatic blood flow, effect of carbon dioxide upon, 954 (Abst.)
cirrhosis and ascites, body weight in, relation of acute changes in colloidal osmotic pressure to, 688
decompensated, biochemical and clinical effects from a cation-anion exchange resin in, 518
coma, blood ammonia and electrolytes in, 499
function, influence of alcohol consumption on, in healthy gainfully employed men, 705
injury, experimental, serum iron in, 934 (Abst.)
porphyria, experimental, 947 (Abst.)
Hepatitis, homologous serum, fatal, severe carbon tetrachloride poisoning with recovery followed by, 380
Hexamethonium or hydralazine with Rauwolfia serpentina in treatment of hypotension, comparison of results, 926 (Abst.)
Hippuric acid, formation in liver disease, effect of repeated injections of sodium benzoate on, 872
Histoplasmosis, coccidioidomycosis, and blastomycosis, serologic diagnosis with respect to, and the problem of cross reactions, 896
Hodgkin's disease, blood of patients with, effect of adenylates on level of adenosine-triphosphate in blood of normal persons and, 255
Homologous bone marrow emulsion, effect on rabbits after total body irradiation, 581
serum hepatitis, fatal, severe carbon tetrachloride poisoning with recovery, followed by 380
Homozygous hemoglobin C and sickle cell trait union; clinical, hematological and electrophoretic study, 918 (Abst.)
Humidity, relative, influence of, on survival of virulent tubercle bacilli deposited on surfaces, 776 (Abst.)
Hydralazine, syndrome elicited by prolonged administration of large doses of, 801 (Abst.)
1-Hydrazinophthalazine in essential hypertension, cardiovascular, cerebral, and renal hemodynamic and metabolic adjustments to, 797 (Abst.)
Hydrocortisone acetate intra-articularly administered to rheumatoid patients, systemic effects from, 961 (Abst.)
Hykinone in correcting hypoprothrombinemia, effectiveness of, 805 (Abst.)
Hyperadrenal states, differentiating, intravenous infusion of compound F as means of, 951 (Abst.)
Hypercholesteremia, effect of dietary constituents on, assay technique for evaluating, 822 (Abst.)
Hypercholesterolemia, electrophoresis of lipoproteins in, effect of injected heparin on, 786 (Abst.)
Hypernatremia, syndromes involving, 948 (Abst.)
Hypertension and diabetes in Negroes with acute myocardial infarction, incidence of, 966 (Abst.)
essential, 1-Hydrazinophthalazine in, cardiovascular, cerebral, and renal hemodynamic and metabolic adjustments to, 797 (Abst.)
treatment with renin and antirenin in dogs, 824 Abst.)
level of blood pressure necessary to maintain glomerular filtration rate in, attempt to determine the critical, by use of ganglionic blocking agent for reducing blood pressure, 819 (Abst.)
malignant, increased cerebrospinal fluid pressure and papilledema as independent manifestations of, 957 (Abst.)
pulmonary, role of pulmonary arterial oxygen content in genesis of, 785 (Abst.)
treatment with Rauwolfia serpentina alone and in combination with hexamethonium or hydralazine, comparison of results, 926 (Abst.)
Hypertensive disease, intravenous McN-181 in, response to, 810 (Abst.)
kidney, hemodynamic, metabolic and electrolyte responses of, to intravenous administration of Sodium p-Sulfamyl Benzoate, 797 (Abst.)

Hyperthyroidism, diagnosis, clinical value of butanol extractable I^{131} in, 949 (Abst.)
Hypocholesterolemic factor in renal blood of dogs, attempt to establish presence of, 800 (Abst.)
Hypoprothrombinemia, vitamin K in correcting, 805 (Abst.)
Hypothermia, metabolic changes in, 816 (Abst.)

I

Idiopathic thrombocytopenic purpura, ACTH and cortisone in, therapeutic evaluation of, 919 (Abst.)
Immunity, level of, against influenza virus, possible use of serum pools as index of, 790 (Abst.)
Immunologic mechanisms of leukocyte abnormalities, 555
In vitro uptake of radiophosphorus by human erythrocytes, factors influencing, 165
In vivo sodium-removing activity of various types of ion exchange resins in rats, comparison of, 430
Incubators, biological test for, 158
Infection, streptococcal, failure of antistreptolysin to protect against, 140
Infections, group A hemolytic streptococci, repeated pulmonary, nonspecific protective effect in, 809 (Abst.)
of cells, latent viral, 813 (Abst.)
streptococcal, erythromycin and penicillin in, comparative efficacy of, 811 (Abst.)
Influenza, prevention of, by vaccination, application of epidemiologic principles to, 798 (Abst.)
virus, cytoplasmic changes due to, early electron microscopy of, 813 (Abst.)
level of immunity against, use of serum pools as index of, 790 (Abst.)
Injection apparatus, a satisfactory constant, 663
pipette for determination of cardiac output by dye method, an improved, 773
Insulin and serum antihormonal activity, skin test responses to, in combined insulin allergy and resistance, 791 (Abst.)
Intermittent ventricular bigeminy, mechanisms of, 830 (Abst.)
Intestinal flora, modification of, influence upon choline utilization, 822 (Abst.)
Intravascular clots, enzymatic dissolution of, 952
Intrinsic factor activity, new test for, 946 (Abst.)
studies. II. The effect of gastric juice on the urinary excretion of radioactivity after the oral administration of radioactive vitamin B_{12}, 860
Inulin and creatinine, renal excretion in man, 621
Iodinated serum albumin, disappearance from circulation of edematous subjects by continuous recording method, 925 (Abst.)
I^{131}, butanol extractable clinical value in diagnosis of hyperthyroidism, 949 (Abst.)
renal excretion of, 788 (Abst.)
I^{131}-labeled protein test meal, blood isotope levels following, 377
Ion exchange resins, in vivo sodium-removing activity of various types of, comparison in rats, 430
Iron, mobilization and removal of, in hemochromatosis, ethylenediaminetetraacetic acid in, 550
Iron-binding capacity of human serum, determination by new method, using radioiron, 907
Irradiated rabbits, proteolytic enzyme studies in, 592
Irradiation, total body, and hemiadrenalectomy, endocrine changes after, in parabiotic rats, 396
effect of homologous bone marrow emulsion on rabbits after, 581
Isoniazid C^{14}, uptake of, and metabolic state of tubercle bacilli, relationship between, 779 (Abst.)
Isosensitization to Kell factor, 570

J

Jaundice complicating alcoholic steatosis of liver, 958 (Abst.)
dependence of percentage cholesterol esters upon degree of, 134

K

Kell factor, isosensitization to, 570
Kidney, hypertensive, hemodynamic, metabolic, and electrolyte responses of, to intravenous administration of Sodium p-Sulfamyl Benzoate, 797 (Abst.)

L

Laboratory, diagnostic, carbon dioxide and routine cultures in, 485
methods, 145, 310, 468, 646, 749, 907

Laennec's cirrhosis, effect of oral potassium in, 923 (Abst.)
metabolic studies, 923 (Abst.)
L-cystine, utilization by leukemic leukocytes in vitro, 964 (Abst.)
L. E. phenomenon, time-lapse microcinematographic studies of, 939 (Abst.)
Leanness-fatness in man, relation of creatinine coefficient to, 784 (Abst.)
Leukemia, chronic granulocytic, treatment with intravenous colloidal gold^{198}, early results of, 777 (Abst.)
myeloid, in mice following intermittent cortisone therapy, 963 (Abst.)
urinary excretion of uracil in, 817 (Abst.)
early atypical manifestations of, 923 (Abst.)
6-Mercaptopurine in treatment of, clinical evaluation, 792 (Abst.)
Leukemic leukocytes in vitro, utilization of labeled L-cystine by, 964 (Abst.)
Leukocyte abnormalities, immunologic mechanisms of, 555
Leukocytes, human, destruction of staphylococci by, 289
leukemic, in vitro utilization of labeled L-cystine by, 964 (Abst.)
Lipase determination, new technique for, 310
Liver, alcoholic steatosis of, jaundice complicating, 958 (Abst.)
catalase metabolism, disturbance in, resulting from excessive porphyrin formation, 947 (Abst.)
cirrhosis of, multiple myeloma, and eclampsia, clotting factor of plasma deficient in, 933 (Abst.)
disease, corticosteroid excretion in, 116
hippuric acid in, effect of repeated injections of sodium benzoate on formation of, 872
dysfunction, experimental, production and repair of, by modifications of dietary protein, 823 (Abst.)
function tests, studies of. III. Dependence of percentage cholesterol esters upon the degree of jaundice, 134
IV. Effect of repeated injections of sodium benzoate on the formation of hippuric acid in patients with liver disease, 872
lesions following intravenous polyvinyl pyrrolidone (PVP), 812 (Abst.)
Long-life radiochloride, Cl^{36}, chloride "space" and total exchanging chloride in man measured with, 16
Long-term prognosis following myocardial infarction, 825 (Abst.)
Lymph nodes, uptake of subcutaneous and intramuscular silvercoated radioactive gold colloids by, in dogs, 739
Lymphocytes, blood, quantitative and qualitative changes of, assessment of stress in human subjects by means of, 538
motility patterns of, 940 (Abst.)
Lymphocytic response to stress stimuli, quantitative and qualitative, 530
Lymphomas, malignant, antibody formation in, 232

M

Malignant hypertension, increased cerebrospinal fluid pressure and papilledema as independent manifestations of, 957 (Abst.)
lymphomas, antibody formation in, 232
Malnourished patients with edema, observations on, 954 (Abst.)
Maturation of megaloblasts in tissue culture, effect of vitamin B_{12} and intrinsic factor on, 934 (Abst.)
Maximow technique for preparation of sections of hematopoietic tissues, 145
McN-181 in hypertensive disease, response to, 810 (Abst.)
Mean cardiac vector, importance in vectorcardiography, better method to obtain sagittal and other components of, 935 (Abst.)
Medical intern-resident education, changing trends in, 1
Megaloblastic anemias, nucleic acid composition of bone marrow in, effect of vitamin B_{12}, folic acid, and ascorbic acid on, 959 (Abst.)
marrow, production of, by cortisone in aplastic anemia, with subsequent response to vitamin B_{12}, 778 (Abst.)
Megaloblasts in tissue culture, effect of vitamin B_{12} and intrinsic factor on maturation of, 934 (Abst.)
Meningococcus toxin, experimental shock produced by, 787 (Abst.)
Mephyton in correcting hypoprothrombinemia, effectiveness of, 805 (Abst.)
6-Mercaptopurine in treatment of leukemia, clinical evaluation, 792 (Abst.)
Mercurial diuretic, 3-chloromercuri-2-methoxypropylurea (1347 EX), a new oral, clinical experience with, 269
diuretics, comparative efficacy of various, 802 (Abst.)
Metabolic changes in hypothermia, 816 (Abst.)
studies of Laennec's cirrhosis, 923 (Abst.)

Metabolism, erythrocyte carbohydrate. I. The flow of C^{14}-glucose carbon into lactic acid, carbon dioxide, cell polymers and carbohydrate intermediate pool, 178
II. Chromatographic isolation of monophosphoglycerate, diphosphoglycerate, and adenosine triphosphate and their metabolic turnover with glucose carbon, 188
of dextran—a plasma volume expander, 6
vitamin B_6, in pregnancy, disturbance of. II. The influence of various amounts of pyridoxine hydrochloride upon the abnormal tryptophane load test in pregnant women, 98
Methimazole granulocytopenia, blood and bone marrow studies in, 920 (Abst.)
Micrococcus pyogenes, chromosome map based on determinations of sensitivities of individual strains to antibiotics, 960 (Abst.)
Microtome, vibratory, for sectioning living tissue, 468
Mitral commissurotomy, preoperative and postoperative hemodynamic studies in, 945 (Abst.)
stenosis, alveolar-arterial oxygen pressure gradient in, 108
valve disease, electrocardiogram in, 950 (Abst.)
physiologic measurements in, 950 (Abst.)
valvuloplasty, postoperative syndrome following, 783 (Abst.)
valvulotomy, auricular fibrillation occurring in immediate postoperative period following, 799 (Abst.)
Morphology and sporulation capacity of Coccidioides immitis, 438
Motility patterns of lymphocytes, 940 (Abst.)
Murmur production, mechanism of, 938 (Abst.)
Myeloid leukemia, chronic, in mice following intermittent cortisone therapy, 963 (Abst.)
urinary excretion of uracil in, 817 (Abst.)
Myeloma, multiple, fibrin formation in, interference with, by unusual protein found in blood and urine, 847
Myocardial infarction, acute, in Negroes, incidence of hypertension and diabetes in, 966 (Abst.)
creatinuria in, 780 (Abst.)
healed, cardiovascular function in, 794 (Abst.)
long-term prognosis following, 825 (Abst.)
infarcts, cortisone treatment of, 807 (Abst.)
Myocardial—Cont'd
lesions, induction of, by Coxsackie (pleurodynia) virus and cortisone, 826 (Abst.)

N

Needle biopsy as aid in diagnosis of renal disease, 152
Neohydrin, a new oral mercurial diuretic, clinical experience with, 269
Nephrotic syndrome, treatment with nitrogen mustard and ACTH, 918 (Abst.)
Nitrogen mustard and ACTH treatment of nephrotic syndrome, 918 (Abst.)
Nucleic acid composition of bone marrow in megaloblastic anemias, effect of vitamin B_{12}, folic acid, and ascorbic acid on, 959 (Abst.)

O

Optical isomers of cysteine, utilization by leukocytes, 964 (Abst.)

P

P vector loop in normals, in right and in left atrial hypertrophy as studied by differential vectorcardiography, 645 (Abst.)
Papilledema and increased cerebrospinal fluid pressure as independent manifestations of malignant hypertension, 957 (Abst.)
Parabiotic rats, hemiadrenalectomy and total body irradiation in, endocrine changes after, 396
PAS, tuberculostatic potency of, effect of probenecid on, 793 (Abst.)
Penicillin and erythromycin in streptococcal infections, comparative efficacy of, 811 (Abst.)
G and benzethacil by mouth, 417
levels in plasma, comparison of, after single oral doses, 417
preoperative treatment, effect on bacterial content of excised tonsils and on posttonsillectomy bacteremia, 936 (Abst.)
Penicillin-dihydrostreptomycin therapy for subacute streptococcal endocarditis, clinical and laboratory experiences with, 806 (Abst.)
Pepper and depepperinized condiment, effect of, upon gastric acidity, 819 (Abst.)
Peptic activity, azoalbumin method for determination, 915
Pernicious anemia, alteration of ascorbic acid oxidation in, 967 (Abst.)
nasal instillation and inhalation of crystalline B_{12} in treatment of, 925 (Abst.)

Pernicious anemia—Cont'd
serum vitamin B_{12} concentrations in, 928 (Abst.)
stomach in treated; cytologic study, 942 (Abst.)
Phagocytose streptococci, effect of large doses of cortisone upon ability of reticuloendothelial cells to, 746
Phagocytosis of virus modified R. B. C., effect of specific antibody on, 922 (Abst.)
Phenylbutazone, oral, in gout, 818 (Abst.)
Photoelectric bubble flow meter, stable precision in a readily assembled, continuously recording, 766
Physiologic measurements in mitral valve disease, 950 (Abst.)
Plasma deficient in cirrhosis of liver, multiple myeloma, and eclampsia, clotting factor in, 933 (Abst.)
Dioxyline in, spectrophotometric determination of, 479
lipoprotein changes induced by mild local cold injury, 112
penicillin levels in, comparison of, after single oral doses, 417
volume expander, metabolism of dextran, 6
Plastic containers, preservation of human blood stored in experimental, evaluation of. I. In vitro studies, 665
II. In vivo studies, 674
Plate complement-fixation tests, apparatus employed in, 655
Platelets, antigenicity of, and evidence of platelet groups and types in man, 723
studies on. XI. Antigenicity of platelets and evidence of platelet groups and types in man, 723
Pneumonia in Navy recruits; etiology and controlled evaluation of therapy, 962 (Abst.)
Pneumoperitoneum air, changes in composition of, following injection of ambient air, 788 (Abst.)
Poisoning, carbon tetrachloride, severe, with recovery followed by fatal homologous serum hepatitis, 380
Polycythemia vera, triethylene melamine (TEM) treatment of, 921 (Abst.)
Polyvinyl pyrrolidone (PVP), intravenous, liver lesions following, 812 (Abst.)
Porphyrin formation, excessive, resulting from disturbance in liver catalase metabolism, 947 (Abst.)
Postoperative syndrome following mitral valvuloplasty, 783 (Abst.)
Posttonsillectomy bacteremia, effect of preoperative penicillin treatment on bacterial content of excised tonsils and on, 936 (Abst.)
Potassium, oral, effect in Laennec's cirrhosis, 923 (Abst.)
sodium, and chloride contents of thermal sweat of man collected from small isolated areas of skin, 58
Precision, stable, in bubble flow meter, 766
Pregnancy, determination, comparison of Xenopus laevis and Rana nigromaculata as test animals for, 646
eclamptogenic toxemia of, intravascular hemolysis, thrombocytopenia, and other hematologic abnormalities associated with, 929 (Abst.)
vitamin B_6 metabolism in, disturbance of. II. The influence of various amounts of pyridoxine hydrochloride upon the abnormal tryptophane load test in pregnant women, 98
Preservation of human blood stored in experimental plastic containers, evaluation of. I. In vitro studies, 665
II. In vivo studies, 674
Pressure gradients, right auriculoventricular, with special reference to tricuspid stenosis, 789 (Abst.)
pulmonary arterial wedge, significance of, 408
Primary pulmonary arteriosclerosis, 794 (Abst.)
Probenecid, effect of, on tuberculostatic potency of PAS, 793 (Abst.)
Prophylaxis, gamma globulin, effect of, on susceptibility to reinfection, 808 (Abst.)
Protein anabolic effect of quinidine, 804 (Abst.)
and carbohydrate diet, influence on blood pressure and heart rate in normal dogs, 966 (Abst.)
I^{131}-labeled, test meal, blood isotope levels following, 377
patterns in gastric juice identified by ultracentrifuge, 969
total, determination of, in small quantities of spinal fluids, 489
unusual, found in blood and urine, interference with fibrin formation in multiple myeloma by, 847
Proteolytic enzyme studies in irradiated rabbits, 592
Prothrombin conversion factor, stable, congenital familial deficiency of, 212
Pulmonary arterial oxygen content, role of, in genesis of pulmonary hypertension, 785 (Abst.)
pressure tracings in man, analysis of respiratory fluctuations in, 939 (Abst.)
wedge pressure, significance of, 408
arteriosclerosis, primary, 794 (Abst.)

Pulmonary—Cont'd
hemodynamic pattern in atrial septal defects before and after closure, 785 (Abst.)
infections, repeated, caused by group A hemolytic streptococci, nonspecific protective effect in, 809 (Abst.)
Pulmonic stenosis, congenital, electrocardiogram in, 952 (Abst.)
Pulse rate and blood pressure, effect of exercise on, in normal subjects, 803 (Abst.)
waves, left atrial pressure, characteristics of, recorded at thoracotomy from normal human hearts and from those with mitral stenosis and regurgitation, 781 (Abst.)
Pulsus alternans, study of, 943 (Abst.)
PVP, intravenous, liver lesions following, 812 (Abst.)
Pyridoxine hydrochloride, influence of various amounts of, upon abnormal tryptophane load test in pregnant women, 98

Q

Quantitative protein flocculation-ninhydrin reaction, photometric microdetermination of gamma globulin in cerebrospinal fluid by, 316
Quinidine, in restoration of sinus rhythm in auricular fibrillation, 957 (Abst.)
pharmacologic property of, a new, 804 (Abst.)
plasma levels and rate of decline following cessation of administration, 956 (Abst.)
protein anabolic effect, 804 (Abst.)

R

Radioactive carbon-labeled dextran, studies in dogs, 6
colchicine, renal excretion in patients with and without neoplastic disease, 960 (Abst.)
gold colloids, silver-coated, uptake of subcutaneous and intramuscular, by lymph nodes in dogs, 739
iron, in vitro uptake of, by avian erythrocytes, 833
sodium chromate for study of survival of red blood cells. I. The effect of radioactive sodium chromate on red cells, 358
II. The rate of hemolysis in certain hematologic disorders, 368
Radioactivity, urinary excretion effect of gastric juice on, after oral radioactive vitamin B_{12}, 860
Radiochloride Cl^{36}, long-life, chloride "space" and total exchanging chloride in man measured with, 16
Radiophosphorus, in vitro uptake of, by human erythrocytes, factors influencing, 165
Rana nigromaculata and Xenopus laevis as test animals for determination of pregnancy, comparison of, 646
Rauwiloid treatment of hypertension, results in, 926 (Abst.)
Reaction, quantitative protein flocculation-ninhydrin, photometric determination of gamma globulin in cerebrospinal fluid by, 316
Reactions, transfusion, bacteria implicated in, 273
Red blood cells, survival of, radioactive sodium chromate for study of. I. The effect of radioactive sodium chromate on red cells, 358
II. The rate of hemolysis in certain hematologic disorders, 368
cell and antirabbit platelet factors in normal blood, 713
survival studies in abnormal hemoglobin syndromes, 963 (Abst.)
cells, hemolysis of, in hereditary spherocytosis and sickle-cell disorders, function of spleen in, 965 (Abst.)
Regitine, urinary pH response to hemoglobin and its modification by, and by changes in serum sodium level, 78
Reinfection, susceptibility to, effect of gamma globulin prophylaxis on, 808 (Abst.)
Renal blood of dogs, hypocholesterolemic factor in, attempt to establish presence of, 800 (Abst.)
disease, needle biopsy as aid in diagnosis of, 152
excretion of creatinine and inulin in man, 621
of I^{131}, 788 (Abst.)
of radioactive colchicine in patients with and without neoplastic disease, 960 (Abst.)
function, effect of, upon electrocardiographic response to alkalosis, 815 (Abst.)
in human being, effect of dialized concentrated human urine on, 685
tubular reabsorption of fructose, maximal, in normal and diabetic man, 827 (Abst.)
Renin and antirenin treatment of essential hypertension in dogs, 824 (Abst.)
Resin, cation-anion exchange, biochemical and clinical effects of, in decompensated hepatic cirrhosis, 518

Respiratory fluctuations in pulmonary arterial pressure tracings in man, 939 (Abst.)
Reticuloendothelial cells, effect of large doses of cortisone upon the ability of, to phagocytose streptococci, 746
Rh antibodies, titer of, effect of some serums on, 85
sensitization, method for detection of, 85
Rhesus grouping, rapid method, using automatic shaker, 472
Rheumatoid arthritis, serum protein fractions in, 805 (Abst.)
patients, hydrocortisone acetate intra-articularly administered to, systemic effects from, 961 (Abst.)

S

Sensitivity tests with combinations of antibiotics: unsuitability of disc method, 163
Sensitization, Rh, method for detection of, 85
Serum albumin, iodinated, disappearance from circulation of edematous subjects by continuous recording method, 925 (Abst.)
antihormonal activity, skin test responses to insulin and, in combined insulin allergy and resistance, 791 (Abst.)
erythrophagocytic properties of, in acute disseminated lupus erythematosus, 940 (Abst.)
globulins, cholesterol, and lipoproteins, alterations in, as related to diabetic retinitis, 812 (Abst.)
iron in experimental hepatic injury, 934 (Abst.)
level, diurnal rhythm of, effect of diet and environmental temperature on, 817 (Abst.)
iron-binding capacity of human, determination by new method, using radioiron, 907
panagglutinin active against trypsinated human erythrocytes, studies on normal. II. Relationship to cold agglutination, 205
pools as index of level of immunity against influenza virus, possible use of, 790 (Abst.)
protein binding of thyroxin and triiodothyronine, comparison of, 799 (Abst.)
fractions in rheumatoid arthritis, 805 (Abst.)
proteins, electrophoretic pattern in anaphylactoid and idiopathic thrombocytopenic purpura, 968 (Abst.)
sodium level, changes in, urinary pH response to hemoglobin and its modification by Regitine, and by, 78
vitamin B_{12} concentrations in pernicious anemia, 928 (Abst.)
Serums, effect of some on titer of Rh antibodies, 85
Shock, experimental, produced by meningococcus toxin, 787 (Abst.)
Sickle cell anemia bloods, composition of non-S hemoglobin fraction in, comparative quantitative study by methods of electrophoresis and alkali denaturation, 193
trait and homozygous hemoglobin C; clinical, hematological and electrophoretic study, 918 (Abst.)
Silver-coated radioactive gold colloids, uptake of subcutaneous and intramuscular, in lymph nodes in dogs, 739
Sinus rhythm, restoration in auricular fibrillation by use of quinidine, 957 (Abst.)
Skin test responses to insulin and serum antihormonal activity in combined insulin allergy and resistance, 791 (Abst.)
vascular reactions of human, relation of eczema to attitude and to, 238
Smallpox vaccine, stability of viral potency of, when prepared in calf globulin, dehydrated, and stored without refrigeration, 693
Sodium benzoate, effect of repeated injections on formation of hippuric acid in liver disease, 872
potassium, and chloride contents of thermal sweat of man collected from small isolated areas of skin, 58
p-Sulfamyl Benzoate, intravenous, hemodynamic, metabolic, and electrolyte responses of hypertensive kidney to, 797 (Abst.)
Somnolentia, experimentally induced, following test feeding of allergenic foods or exposure to certain petroleum products, 932 (Abst.)
Spectrophotometric determination of Dioxyline in plasma, 479
Spinal fluids, total protein in, determination in small quantities of, 489
Spleen, antigen localization and degradation and histologic reaction in normal, x-irradiated, and spleen-shielded rats, 598
function in hemolysis of red cells in hereditary spherocytosis and sickle-cell disorders, 965 (Abst.)
Spontaneous diabetes in dogs, 937 (Abst.)
Staphylococci, antibiotic-resistant strains, effect of antibiotic usage in hospital on incidence of, among personnel, 832 (Abst.)
destruction of, by human leukocytes, 289
Starch zone electrophoresis, thyroxin in alpha globulin fraction of serum separated by, radiochromatographic identification of, 777 (Abst.)

Steroid estimation of urine, comparison of tetrazolium and other methods of, 758

Steroidal excretion and metabolic effects induced by stress and by ACTH, comparison of, 796 (Abst.)

Stomach in treated pernicious anemia, cytologic study, 942 (Abst.)

Streptococcal endocarditis, subacute, penicillin-dihydrostreptomycin therapy for, clinical and laboratory experiences with, 806 (Abst.)

infection, erythromycin and penicillin in, comparative efficacy of, 811 (Abst.)

failure of antistreptolysin to protect against, 140

Streptococci, effect of large doses of cortisone upon ability of reticuloendothelial cells to phagocytose, 746

Streptococcus mitis endocarditis, experimental, induction and pathologic characteristics of, 930 (Abst.)

Stress, assessment of, by means of quantitative and qualitative changes of blood lymphocytes, 538

steroidal excretion and metabolic effects induced by, and by ACTH, comparison of, 796 (Abst.)

stimuli, quantitative and qualitative responses of blood lymphocytes to, 530

Stuporous drunkenness, experimentally induced, following test feeding or exposure to certain petroleum products, 932 (Abst.)

Sump phenomenon, relief of resistant edema by utilization of, 946 (Abst.)

Sweat, thermal, sodium, potassium, and chloride contents of, collected from small isolated areas of skin in man, 58

Syndrome elicited by prolonged administration of large doses of hydralazine, 801 (Abst.)

Syndromes involving hypernatremia, 948 (Abst.)

T

Telangiectasia, essential, pulmonic and tricuspid stenosis, and neoplastic liver disease: a possible new clinical syndrome, 941 (Abst.)

TEM treatment of polycythemia vera, 921 (Abst.)

Temperature, environmental, and diet, effect of, on diurnal rhythm of serum iron level, 817 (Abst.)

Test animals for determination of pregnancy, comparison of Xenopus laevis and Rana nigromaculata as, 646

Test animals—Cont'd

feeding of allergenic foods, experimentally induced cerebral syndrome following, 931 (Abst.)

somnolentia experimentally induced following exposure to certain petroleum products and, 932 (Abst.)

meal of I^{131}-labeled protein, blood isotope levels following, 377

Tetrazolium and other methods of steroid estimation, comparison of, as applied to urine, 758

salts, methods of estimation of adrenal cortical steroids with, 749

Thermal sweat, sodium, potassium, and chloride contents of, collected from small isolated areas of skin in man, 58

Thermogenic response following intravenous fat, possible relationship of hemolysis to, 780 (Abst.)

Thiamine deficiency, mild, effects of glucose on blood pyruvic acid levels in, 261

Third heart sound, dynamics of, 800 (Abst.)

Thoraco-cervical vagectomy, effect of, on cardiovascular response to exercise, 803 (Abst.)

Thoracotomy, left atrial pressure pulse waves recorded at, characteristics of, 781 (Abst.)

Thrombin accelerator, 933 (Abst.)

Thrombocytopenic purpura, anaphylactoid and idiopathic, electrophoretic pattern of serum proteins in, 968 (Abst.)

Thyroid and renal function, I^{131} and inulin clearances in varying states of, simultaneous determinations of, 788 (Abst.)

function, variations of, relationship of exophthalmos to, 780 (Abst.)

Thyroxin and triiodothyronine, serum protein binding of, comparison of, 799 (Abst.)

in alpha globulin fraction of serum separated by starch zone electrophoresis, radiochromatographic identification of, 777 (Abst.)

Time-lapse microcinematographic studies of L. E. phenomenon, 939 (Abst.)

Tissue culture, effect of vitamin B_{12} and intrinsic factor on maturation of megaloblasts in, 934 (Abst.)

living, a vibratory microtome for sectioning, 468

Tissues, hematopoietic, Maximow technique for preparation of sections of, 145

Titer of Rh antibodies, effect of some serums on, 85

Tocopherol response curves and fat absorption, 700
Tonsils, bacterial content of excised, effect of preoperative penicillin treatment on, and on posttonsillectomy bacteremia, 936 (Abst.)
Toxic effects of modified human globin, 224
Tracer method, electrolyte space measured by, in intact man, 34
substance, fluorescent, study of movements of cutaneous interstitial fluids in human beings by means of, 299
Transfusion reactions, bacteria implicated in, 273
Tricuspid stenosis, right auriculoventricular pressure gradients with special reference to, 789 (Abst.)
Triethylene melamine (TEM) treatment of polycythemia vera, 921 (Abst.)
Triiodothyronine and thyroxin, serum protein binding of, comparison of, 799 (Abst.)
Trypsinated human erythrocytes, normal serum panagglutinin active against, studies on. II. Relationship to cold agglutination, 205
Tryptophane load test in pregnant women, influence of various amounts of pyridoxine hydrochloride upon the abnormal, 98
Tubercle bacilli, acid-fastness of, metabolic significance of, 828 (Abst.)
metabolic state of, and uptake of C^{14} isoniazid, relationship between, 779 (Abst.)
virulent, deposited on surfaces, influence of relative humidity on survival of, 776 (Abst.)
Tuberculostatic potency of PAS, effect of probenecid on, 793 (Abst.)

U

Ultracentrifuge, protein patterns in human gastric juice as identified by, 969 (Abst.)
Unstained cell counts as method of evaluating cancerocidal agents, 326
Uptake of C^{14} isoniazid and metabolic state of tubercle bacilli, relationship between, 779 (Abst.)
Uracil, urinary excretion of, in chronic myeloid leukemia, 817 (Abst.)
Urinary excretion of ammonia, relation of acidosis to, in patients receiving cation exchange resins, 783 (Abst.)
of radioactivity, effect of gastric juice on, after oral radioactive vitamin B_{12}, 860
of uracil in chronic myeloid leukemia, 817 (Abst.)
Urinary—Cont'd
pH response to hemoglobin and its modification by an antiadrenergic drug and by changes in serum sodium level, 78
Urine, dialyzed concentrated human, effect on renal function in human being, 685
steroid estimation of, comparison of tetrazolium and other methods of, 758

V

Vaccination, prevention of influenza by, application of epidemiologic principles to, 798 (Abst.)
Vaccine, smallpox, viral potency of, stability of, when prepared in calf globulin, dehydrated, and stored without refrigeration, 693
Valvuloplasty, mitral, postoperative syndrome following, 783 (Abst.)
Valvulotomy, mitral, auricular fibrillation occurring in immediate postoperative period following, 799 (Abst.)
Vascular reactions of human skin, relation of eczema to, and to attitude, 238
Vectorcardiogram, dissection of, 814 (Abst.)
Vectorcardiography, a better method to obtain sagittal and other components of mean cardiac vector in, 935 (Abst.)
differential, 814 (Abst.)
P vector loop in normals, in right and in left atrial hypertrophy as studied by, 645 (Abst.)
Ventilation in heart disease, mechanics of, 791 (Abst.)
Ventricular bigeminy, intermittent, mechanisms of, 830 (Abst.)
Vibratory microtome for sectioning living tissue, 468
Viral infections of cells, latent, 813 (Abst.)
potency of smallpox vaccine, stability of, when prepared in calf globulin, dehydrated, and stored without refrigeration, 693
Virus, Coxsackie, and cortisone, induction of myocardial lesions by, 826 (Abst.)
influenza, level of immunity of, serum pools as index of, 790 (Abst.)
Viscosimetric determination of blood fibrinogen, 641
Vitamin A, absorption of, effect of eating upon, 924 (Abst.)
Carr-Price antimony trichloride reagent for determination of, use of 1,2,-dichloroethane in, 660
B_6 deficiency induced by desoxypyridoxine in human beings, effect of, 335

Vitamin B_6—Cont'd
metabolism in pregnancy, disturbance of. II. The influence of various amounts of pyridoxine hydrochloride upon the abnormal tryptophane load test in pregnant women, 98
B_{12} and intrinsic factor, effect on maturation of megaloblasts in tissue culture, 934 (Abst.)
radioactive, oral, effect of gastric juice on urinary excretion of radioactivity after, 860
serum concentrations in pernicious anemia, 928 (Abst.)
K, water and oil-soluble preparations of, effectiveness of, in correcting hypoprothrombinemia, 805 (Abst.)

W

Water diuresis, spontaneous antidiuresis during; renal function and electrolyte excretion, 509

X

Xenopus laevis and Rana nigromaculata as test animals for determination of pregnancy, comparison of, 646

Z

Zephiran as a solvent, determination of Evans blue using, 493
